EDUCATION

Georgia Institute of Technology

Atlanta, GA

Bachelor of Science in Computer Science, GPA: 3.9/4.0

May 2027

- **Related Coursework:** Data Structures & Algorithms, Databases & SQL, Algorithm Design, Computer Architecture & Programming, Software Design & UML, Object-Oriented Programming, Computing in Python, Discrete Mathematics, Linear Algebra

EXPERIENCE

Bits of Good

Atlanta, GA

Software Developer

Jan. 2025 – Present

- Replaced MongoDB driver with **Mongoose** in **10 backend services**, adding schema validation and reducing future dev overhead across 23 API endpoints. **Cut feature build time by 25%** by standardizing Mongoose models.
- Built **Next.js** front-end for medication management with **Zod**-based validation to prevent scheduling data conflicts.
- Implemented **JWT-based password reset system** in Node.js with token expiry to safeguard brute force attacks.

Technique Newspaper

Atlanta, GA

Software Developer

Nov. 2024 – Present

- **Cut page load by 8s** by replacing WordPress front-end with static-rendered Next.js for Tech's student newspaper.
- Rebuilt UI/UX with TailwindCSS, increasing **Lighthouse Accessibility and SEO to 96/100**.
- **Reduced API load by 55%** by adding middleware that caches WordPress REST calls and merges frequent fetches.

Personality Academy

Remote

Co-Founder

Sept. 2022 – Aug. 2024

- Built and launched full-stack educational platform used by **3,000+ users**, with custom course delivery.
- Designed a **multi-filter search for 2,000+ profiles** with dynamic charts and tagged filtering with **512 categories**.
- Developed full **admin dashboard** managing the 2,000 profiles and an additional **13,000+ content items**.
- Integrated ImageKit CDN to **cut image load times by 60%**, supporting 99.9% upkeep during traffic spikes.

PROJECTS

DataFly CLI - SQL Data Generation | GoLang, Cobra, SQL, LangChain, BubbleTea, Git

[GitHub](#)

- Decreased test environment setup time by **85%** by generating relational SQL data in **under 2 minutes**.
- Built a **LangChain-based parser** to convert SQL schemas into faker files in YAML, supporting 4 SQL dialects.
- Ensured foreign key integrity across complex schemas by building **relationship-aware data generators**.
- **Cut runtime load by 30%** with LangChain on schema parsing and generation to avoid redundant processing.

Dementia Agitation Network | TypeScript, Python, React Native, Flask, Firebase, Spotify API, Expo, Git

[GitHub](#)

- Won "Instructional Choice Award" and **\$1,000 funding** in a competitive 50-team showcase to investors and faculty.
- **Minimized alert latency to under 1s** by streaming agitation events from WHOOP to Firebase on caregiver app.
- Triggered music intervention based on agitation thresholds; processes 5 biometric inputs with **90% data reliability**

Check-In - Automated Attendance | JavaScript, Next.js, PostgreSQL, Prisma, Recharts.js, Vercel, Git

[Website](#) | [GitHub](#)

- **Awarded 1st Place** in the Congressional App Challenge for CO-02 with over **2,000 competing teams** nationwide.
- Deployed across **15+ orgs**, replacing paper sign-ins and cutting check-in times by **40+ minutes per event**.
- Built analytics dashboard with visualizations and CSV export, driving **full adoption** across Poudre School District.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, HTML/CSS, GoLang, Java, SQL, C#, PHP, C, Assembly

Libraries: Pandas, NumPy, Matplotlib, TensorFlow, Axios, Zod, D3.js, Jinja2, Mongoose

Frameworks: Flask, Django, React, React Native, Cobra, NextJS, NodeJS, ExpressJS, Expo, TailwindCSS

Technologies: Git, GitHub, Google Cloud, Firebase, Vercel, Docker, Stripe, Postman, MongoDB, LangChain, Socket.IO
