EDUCATION

Georgia Institute of Technology

Atlanta, GA

Bachelor of Science in Computer Science

May 2027

- **GPA:** 3.9
- **Concentrations:** Artificial Intelligence & Human-Centered Systems
- **Related Coursework:** Data Structures & Algorithms, Databases & SQL, Algorithm Design, Computer Architecture & Programming, User Interface Design, Software Design & UML, Object-Oriented Programming, Computing in Python, Discrete Mathematics, Linear Algebra

EXPERIENCE

Bits of Good

Jan. 2025 – Present

Software Engineering Manager

Atlanta, GA

- Orchestrated development of supply distribution platform for non-profit Hope For Haiti using Next.js & Prisma.
- Authored **60+ GitHub issues**, reviewed **400+ commits**, and resolved merge conflicts to a team of 5 developers.
- Collaborated with designers, PMs, and 6 stakeholders to define a **12-sprint agile plan** for production launch.

Technique Newspaper

Nov. 2024 – Present

Software Developer

Atlanta, GA

- **Cut page load by 8s** by replacing WordPress front-end with static-rendered Next.js for Tech's student newspaper.
- Rebuilt UI/UX with TailwindCSS and React, increasing **Lighthouse Accessibility and SEO to 96/100**.
- **Reduced API load by 55%** by adding middleware that caches WordPress REST calls and merges frequent fetches.

Personality Academy

Sept. 2022 – Aug. 2024

Co-Founder

Remote

- Built and launched full-stack educational platform used by **3,000+ users**, with custom course delivery.
- Designed a **multi-filter search for 2,000+ profiles** with dynamic charts and tagged filtering with **512 categories**.
- Developed full **admin dashboard** managing the 2,000 profiles and an additional **13,000+ content items**.
- Integrated ImageKit CDN to **cut image load times by 60%**, supporting 99.9% upkeep during traffic spikes.

PROJECTS

DataFly CLI - SQL Data Generation | GoLang, Cobra, SQL, LangChain, BubbleTea

May. 2025 - Present

- Decreased test environment setup time by **85%** by generating relational SQL data in **under 2 minutes**.
- Built a **LangChain-based LLM parser** to convert SQL schemas into faker files in YAML, supporting 4 SQL dialects.
- Ensured foreign key integrity across complex schemas by building **relationship-aware data generators**.
- **Cut runtime load by 30%** using chaining on schema parsing and generation to avoid redundant processing.

Dementia Assistance Network | TypeScript, Python, React Native, Flask, Firebase, Expo

Aug. 2024 - Present

- Won "Instructional Choice Award" and **\$1,000 funding** in a competitive 50-team showcase to investors and faculty.
- **Minimized alert latency to under 1s** by streaming agitation events from WHOOP to Firebase in React Native app.
- Triggered music intervention based on agitation threshold; processes 5 biometric inputs with **90% data reliability**.

Intl. Children's Advisory Network | TypeScript, Next.js, MongoDB, TailwindCSS, Zod

Jan. 2025 - May 2025

- Built **8-step medication scheduler** with modular components, state logic, and Zod validation for doses & timing.
- Implemented **JWT-based password reset system** in Node.js with token expiry to safeguard brute force attacks.
- Replaced MongoDB with Mongoose models in 10 backend services, **reducing overhead across 23 API endpoints**.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C, SQL, GoLang, HTML/CSS, C#, PHP, Assembly

Libraries: Pandas, NumPy, Matplotlib, TensorFlow, Prisma, Axios, Zod, Jinja2, Mongoose

Frameworks: React.js, Flask, Next.js, Django, Node.js, React Native, TailwindCSS, Express.js, Expo, Cobra

Technologies: Git, GitHub, Docker, Google Cloud, Firebase, MongoDB, LangChain, Vercel, Postman, Socket.IO
