EDUCATION

Georgia Institute of Technology

Expected Graduation, May 2027

Bachelor's of Science in Computer Science, GPA: 3.9

Atlanta, GA

- **Related Coursework:** Data Structures & Algorithms, Databases & SQL, Software Design & UML, Object-Oriented Programming in Java, Computing in Python, Discrete Mathematics, Linear Algebra

EXPERIENCE

Incoming Engineering Manager @ Bits of Good

Starting Aug. 2025

Incoming Technology Editor @ Technique Newspaper

Starting Aug. 2025

Bits of Good

Software Developer

Jan. 2025 – Present

- Refactored the backend from raw MongoDB to Mongoose, **restructuring 10 domain services and 23 API endpoints**, enhancing maintainability and type safety.
- Built a multi-screen medication management system in NextJS and TailwindCSS, **creating 17 reusable components** and integrating Zod for user validation, **reducing input errors by 60%**.
- Designed a secure password reset system with NodeJS, Mongoose, and BoG's internal email tool, streamlining account recovery for users.

Technique Newspaper

[Website](#)

Software Developer

Nov. 2024 – Present

- Rebuilt Georgia Tech's student newspaper website with NextJS and TailwindCSS, replacing WordPress's builder while maintaining WordPress as a CMS. **Decreased load times by 8000ms and improved SEO rankings.**
- Engineered a custom service wrapper for the WordPress REST API, **reducing API call redundancy by 55%** through caching and simplifying access to posts, images, authors, and categories.

Personality Academy

[Website](#)

Co-Founder

Sept. 2022 – Aug. 2024

- Launched a personality education platform **attracting 3,000+ registered users** using NextJS and Supabase with courses, educative tools, and Stripe integration for donations.
- Developed the TypeSearch tool for **querying 2,000+ typed individuals**, featuring **multi-filter search**, and **dynamic diagrams for 512 unique types** with images managed by ImageKit.
- Implemented a **custom OAuth system** with Google, Discord, and email validation, utilizing Prisma ORM.

PROJECTS

D.A.N. | TypeScript, Python, React Native, Flask, TailwindCSS, Firebase, Expo, Git

[GitHub](#)

- Engineered a mobile companion app for dementia care, syncing real-time health metrics from Apple Watch to track agitation and enhance caregiver awareness.
- Developed a detection pipeline analyzing 5 biometric signals to auto-trigger music interventions via the Spotify API, achieving **95% accuracy** in agitation prediction.
- Secured **\$1,000 in funding** and the **Instructional Choice Award** at a 50-team investor showcase.

Check-In | JavaScript, NextJS, TailwindCSS, RechartsJS, PostgreSQL, Neon, Prisma, Vercel, Git [Website](#) | [GitHub](#)

- Built an automated attendance system for **1,000+ students** across **15+ organizations**, reducing event start-up time by 40+ minutes.
- Designed a real-time analytics dashboard with customizable parameters and CSV import/export, leading to **100% adoption** across a high school district.
- **1st place district winner** of the Congressional App Challenge (2022) out of **2,000+ teams nationwide**; presented the project at the U.S. Capitol.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, HTML, CSS, Java, C#, C++, PHP, SQL, Bash

Libraries: Pandas, NumPy, Matplotlib, TensorFlow, Axios, Zod, RechartsJS, D3.js, Jinja2

Frameworks: Flask, Django, React, React Native, NextJS, NodeJS, ExpressJS, Expo, Tailwind CSS, Bootstrap

Technologies: Git, GitHub, Google Cloud, Firebase, Vercel, Netlify, Docker, Stripe, Postman, MongoDB, Socket.IO
