EDUCATION

Georgia Institute of Technology

Bachelor of Science in Computer Science

Expected May 2027

Atlanta, GA

- **GPA:** 3.9 | **Concentrations:** Artificial Intelligence & Human-Centered Systems

EXPERIENCE

Phia

Software Engineering Intern

Jan. 2025 – Present

New York, NY

- Consolidated product workflows across **7,000+ brands** and **300M-item** catalog by building a unified CMS of editorials, products, and coupons in Next.js, accelerating content operations by **7×**.
- Powered personalized recommendations for **300+ brands** with an LLM pipeline that parsed **1M users'** browsing history into attribute profiles and a K-means model clustering users into **12 cohorts per brand**.
- Boosted extension click-through rate by **40%** and price-drop adoption by **110%** by shipping new product discovery and conversion features .

Bits of Good — Hack4Impact Chapter

Engineering Manager

Jan. 2025 – Jan. 2026

Atlanta, GA

- Orchestrated development of a medical distribution platform serving **56 facilities** and **\$50M+** in annual supplies, re-architecting **170+ files** into a modular controller–service–repository architecture for an 8-person team.
- Reduced manual effort by **80%** by automating distribution workflows via GPT-5, Azure, and RAG pipelines.
- Authored **60+ GitHub issues**, reviewed **400+ commits**, and resolved conflicts while mentoring developers.

Georgia Institute of Technology

Undergraduate Researcher

Aug. 2024 – Jan. 2026

Atlanta, GA

- Preprocessed **2.4 million** biometric data points from Apple HealthKit using Pandas, cleaned into time-series data.
- Achieved **91% accuracy** with a semi-supervised LSTM model in PyTorch, predicting health abnormalities.
- Developed Swift app that streams health data via Firebase to the model for monitoring, alerts, and automations.

PROJECTS

Orca | HackIllinois Grand Prize, 1st out of 700+ teams

Feb. 2026

- Built **3D world model pipeline** with Google Street View and World Labs to simulate fire scenarios on buildings.
- Cut hallucinations by **40%** by deploying multi-agent orchestration on Modal with Redis-based contextual synthesis.
- Attracted pilot interest from the Illinois State Fire Marshal's Office and an **OpenAI** engineer, targeting impact across the **\$14B** U.S. fire training market.

TerraWatt | EnergyHacks Overall Winner, 2nd out of 200+ teams

Jan. 2026

- Built a digital twin pipeline with **Google Earth Engine** to model solar feasibility across **879M+** acres of farmland.
- Shipped a voice-first analytics layer with **ElevenLabs**, processing **50+** farmer queries per session in plain language.
- Generated crop-solar layouts with CAPEX, kWh, and payback in **under 5 minutes** vs 12 week studies with a heuristics optimizer on soil and weather data.

Cimic | AI ATL Hackathon Winner

Nov. 2025

- Built a policy simulation engine modeling impact across **245 neighborhoods** using normalized census GeoJSON.
- Designed a two-phase **Rust+LangChain** pipeline on **Azure AI** for event generation, cutting token usage by **70%**.
- Enabled constituent feedback with **30+ identities**, integrating ElevenLabs agents with contextual memory.

JPMorganChase Code for Good | Hackathon Winner

Sept. 2025

- Built an **AI-driven SMS agent** using Mastra & Twilio to reducing manual event registration and discovery by **60%**.
- Prototyped a unified Next.js dashboard via **Docker** on AWS **EC2** for event creation, approvals, and analytics.
- Collaborated in a team of 7 and presented the solution to JPMorgan engineers and nonprofit judges.

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Java, SQL, Go, Swift, Rust, HTML/CSS, C++ , Assembly

Frameworks: React, Next.js, Node.js, Flask, FastAPI, Django, React Native, Express, TailwindCSS

AI/ML & Data: PyTorch, TensorFlow, Pandas, NumPy, Matplotlib, LangChain, RAG, Mastra

Dev & Tech: Git, Docker, AWS, Google Cloud, Azure, Supabase, Firebase, MongoDB, Redis, Modal, Vercel
